ABOUT ME

Hi! I'm Federico, I'm a full stack developer, I have experience working with JavaScript, React, Redux, Express.js, among others. I consider myself a proactive person, responsible, with logical thinking, I do well working in a team because I believe that cooperation is the best method to solve problems and meet the objectives. I am a curious person, who is always reading different methods or ways to improve my code.

TECHNOLOGIES:

HTML, CSS, JavaScript, React.js, Redux, Node.js, Express.js, Git y Github, Postman, Sequelize, PostgreSQL.

PROJECTS

Full Stack Web Developer – Pi Pokemon (Individual project) Henry Bootcamp, Buenos Aires, Argentina.

- Design and develop a pokemon App that includes: pokemon search, pokemon detail display, filtering, sorting, paging and creation.
- For the development I used React, Redux, pure CSS for the Frontend and Node.js, Express for the Backend. Database in PostgreSQL and Sequelize. [Repositorio](#) | [Deploy](#)

Full Stack Web Developer - Henry Bank (Final group project) Henry Bootcamp, Buenos Aires, Argentina.

- Design and develop an App-mobile that includes: searches, filtering, sorting, user registration, login with authentication, administrator panel, user profile, news, payment gateway and transfers, fixed term, buying and selling cryptocurrencies, mailing system, etc.
- For the development we used React Navite, CSS, Redux, Figma for the Frontend and Node.js with Express for the Backend. Database in PostgreSQL and Sequelize. JWT was used for authentication, Nodemailer for mailing and Stripe for card payments.
- In this project I worked on the Backend side, we worked using the SCRUM methodology where we used Trello to write down the tasks to be done.
