ABOUT ME

Full Stack Web Developer and IT Technician with experience in **JavaScript**, **React**, **Node**, **Express.js**, among others. My approach to solving problems and adapting to new technologies has allowed me to contribute significantly to both individual and team projects. I enjoy collaborating in teams to achieve common goals, as well as keeping abreast of the latest technology trends and looking for ways to improve my code. I am motivated to apply my skills and continue to grow in my career as a **Developer**.

SKILLS

- JavaScript
- React
- Next.js
- Redux
- Tailwind CSS
- Node.js
- Express.js
- Docker
- Sequelize
- Git y Github
- Gitlab
- Postman
- Swagger
- Laravel

PROFESSIONAL EXPERIENCE

Web Developer   Dec. 2023 – Actually

42Mate

Development and maintenance in both Front end and Back end using technologies such as **Next.js**, **React**, **Mantine**, **Tailwind CSS**, **Laravel**, **Laravel Nova**, among other technologies, under the Docker environment. I participate in projects such as **Classroom Champions**, an educational platform that connects athletes with classrooms to deliver a Social and Emotional Learning curriculum, and **Pro Sports**, an application for sports teams with brand customization and content management, including an achievement and points system for students. I use agile methodologies such as Scrum.

Full Stack Web Developer   Mar. 2023 – Dec. 2023

Gobierno de la Ciudad de Buenos Aires

- **Front end** and **Back end** development and maintenance using technologies such as **JavaScript**, **React**, **Tailwind CSS**, **Material UI**, **Sequelize** and **Express**, among others. Implementation of **Docker** containers to optimize deployment.
- Creation and maintenance of routes on the server, ensuring seamless communication between **Front end** and **Back end** and documenting them with **Swagger**.

Freelancer Full Stack Web Developer   Oct. 2022 - Jun. 2023

- I specialize in developing attractive and functional interfaces using **Front end** technologies such as **JavaScript**, **React** and **Tailwind CSS**. I also have experience using **Back end** technologies such as **Express.js**, **MongoDB** and **PostgreSQL**. I have the ability to create exceptional web projects that exceed client expectations.

Technical Support   Jan 2014 – Jul 2022

- Repair and maintenance of desktop and notebook computers, etc. Both at hardware and software level, installation of programs, operating systems, office, etc.
- Back-up of files and file recovery, installation of network cable (UTP), installation of cameras, etc.

PROJECTS

Clone Mercado Libre

Project based on the MercadoLibre Challenge, but this time we made a clone of the MercadoLibre home page and consumed its API to give it some functionalities such as, search items with results view and also filtering, item details showing also questions asked by users.

Repository | Deploy

SmartInvest

Platform where you can find news, listings, trends and details about cryptocurrencies, all in one place. In addition, you will be able to access details and an interactive chart with which you will be able to see prices in different periods, from 24 hours to the historical high. All this is possible thanks to the integration of the CoinGecko API and a news API that I have incorporated into the application.

Repository | Deploy

Under Graff

Women's fashion store project created with **React** and **Tailwind CSS**. On the Platform products are organized into various categories for a seamless shopping experience. Users can browse products and add their favorite items to a personalized shopping cart.

Repository | Deploy

Git Hub App

I have developed a web application using **React** and **Tailwind CSS on** the **Front end**, and **Express.js** for path creation.

The application consumes the GitHub API, using the link-header package to implement the pagination provided by the API itself.

Repository | Deploy
